DWA_04.3 Knowledge Check_DWA4

_____

1. Select three rules from the Airbnb Style Guide that you find **useful** and explain why.

1) The use of const - it prevents from accidentally changing important values. By using const you indicate that a variable won't be reassigned.

2) The use of arrow functions - they have a shorter syntax compared to the regular function and they automatically return results for simple expressions.

3) Use === for comparisons - the strict equality operator. It performs strict equality comparisons, checking both value and data type. Which prevents unintended type coercion.

_____

2. Select three rules from the Airbnb Style Guide that you find **confusing** and explain why.

1) Using 'this' - The guide said we should avoid using it. I don't really understand what 'this' that we should avoid is.
2) Disallowing use 'new' for side effects
3) Require default cases in switch statements

Number 2 and 3 I found very confusing I don't remember hearing or seeing them somewhere. I would like these two to be explained to me.

_____
